29. Diagnostic renal angiography, catheter placements, and pressures are bundled with transcatheter renal denervation codes 0338T and 0339T. These codes are reported for any method of renal denervation (utilized in some patients with severe and/or difficult to treat hypertension), including radiofrequency (RF) ablation, high intensity-focused ultrasound (HIFU) ablation, or direct injection of an agent through the vessel wall to destroy the nerves. Codes 0338T and 0339T sunset in 2029; however, a new Category I CPT code **is anticipated for use in 2028** ~~has been approved for use as of January 1, 2027~~.

34. Hospitals report bilateral IVL procedures **(C9764-C9767 and C9772-C9775)** in the lower extremities with ~~a -50~~ **an -RT and -LT** modifier applied to the appropriate HCPCS Level II code **(or report twice with a -59 modifier on one of the codes)**. Physicians report the appropriate IVL add-on CPT code x2.
